

SERIES G3-SS BALL-TYPE GAUGE VALVE OPTIONS & ACCESSORIES

G3-SS Ball-type gauge Valves are standardly supplied with 304SS latch-lock lever handles, but in applications having space restrictions 304SS latch-lock oval handles are available. Oval handles also lessen the possibility of accidental operation of valve.

All 1/4"-2" size G3-SS ball-type gauge valves can be fitted with C-Series pneumatic actuators and our 304SS mounting kits. The C-Series actuators are available in double-acting and spring-return (fail safe) configurations, and can be supplied with a full range of accessories, including: solenoid valves, breather blocks, limit switches, positioners, etc.
