

SERIES TB MULTI-PORT BALL VALVE OPTIONS & ACCESSORIES

Several handle options are available for the TB Series seal-welded ASME/API compliant 3-way ball valves, including 304SS locking oval handle and 304SS Tee handle. Both fit 1/4"-1" sizes.

Quadrant's exclusive Extended ISO Topworks can be fitted to 1/4" to 2" size TB Series, extending handle position by 4", allowing insulation to be added to piping system. Also provides heat dissipation between piping system and handle. C-Series actuators can also be mounted to extended topworks.

1/4" to 2" size TB Series can be fitted with Quadrant's C-Series pneumatic actuators with our full 304SS actuator mounting kits. Double-acting or spring return models are available, along with a full complement of solenoids, breather blocks, limit switches, declutchable manual overrides, etc.

Quadrant's all-stainless steel spring return "dead-man" handle can be fitted to 1/4" to 1" size TB Series. These handles will assure that ball returns to a pre-determined position when operator releases lever.
